Miracle Agbebaku

Software developer · AI systems, backend and automation

Portfolio: miracle-agbebaku-portfolio.vercel.app · GitHub: github.com/Miraclebot15 · X: x.com/MiracleTechX

SUMMARY

Software developer working on AI systems, agent orchestration, backend engineering and complete products. I care about how a system behaves when real users, messy inputs and failure meet.

FOCUS

- AI agents and orchestration
- Backend, APIs and integrations
- Frontend with React, Next.js and TypeScript
- Messaging automation and developer tooling

SELECTED PROJECTS

NEXUS CORE · **Live**
A governance-first AI orchestration system where models propose plans and separate controls decide what is allowed to run.

ELLA · **Live**
An AI assistant for WhatsApp that holds natural, context-aware conversations instead of rigid helpdesk replies.

CareCore · **Live**
A configurable AI customer-care platform for conversations, orders and payments, with approvals before sensitive actions.

Atelier · **In development**
A conversational studio that turns a written interface brief into a UI concept you can refine.

Engine · **In development**
A UI and 3D-oriented library for building interactive interfaces and visual experiences.

Ultimate Agentic AI · **In development**
An agentic AI project for completing multi-step tasks with tools.

Lagoon · **Live**
A social and communication platform that brings messaging, stories, short video and communities into one app.

AURORA · **Coming soon**
An AI video-editing model designed to support a broad range of visual styles.
